

07 July 2026

Cook Islands CABAF (Currency and Bunker Adjustment Factor) Effective 14 August 2026

Dear Valued Customer,

Due to current currency fluctuations, the ship operator to the Cook Islands has announced a 10% increase to their Currency Adjustment Factor (CAF), effective from 14 August 2026.

Therefore, as a slot partner, we have revised our CABAF (combined Currency and Bunker Adjustment Factor) for all Cook Islands cargo, also effective from 14 August 2026, as a straight pass-through.

Please see the revised rate below:

- Australia, New Zealand and the South Pacific to **AND** from the Cook Islands (Rarotonga and Aitutaki): **45.7%**

Thank you for your continued support. Should you have any further questions please contact your Neptune Pacific representative.

Sincerely,

Neptune Pacific
